Casting Material

Casting Plaster Voigtländer

is used to secure shoeprints and tyreprints, also in wet soil or in snow, quick drying time.

in bag: can be immediately mixed in the bag and can be used after mixing.

in bucket: individually required amount can be removed.

in FixMix: our best solution is delivered in the new 2-chamber bag. Clean, perfectly mixed within seconds, dosage valve for simple individual regulation of water. Sufficient amount for one big shoe print or tyreprint.

Art. No.	Description	Unit
47849	in bag	1.5kg 1 bag
47848	in bucket	4kg 1 bucket
51747	FixMix (2-chamber bag, 1.2kg casting plaster + water)	1 kit

Dental plaster

Art. No.	Description	Unit
50844	Ooclumedanit yellow	1.5kg 1 bag
49643	Ooclumedanit yellow	10kg 1 bucket
53540	Ooclumedanit blue	10kg 1 bucket
51775	FixMix (2-chamber bag, 1.2kg dental plaster + water)	1 kit

Mikro Track™

reusable, soft modelling/ mould-making material used to mould shoes/ tyres.

Art. No.	Description	Unit
49523	Mikro Track	3L 1 bucket

Elastosil

Art. No.	Description	Unit
48592	Elastosil 4514	1kg 1 bucket
47855	Cross Linking Agent for Elastosil 4514	100ml 1 bottle
53545	Elastosil RT 625A+B, two-component silicone	1kg 1 kit

Mikrosil™

Casting material made of silicone to precisely secure tool marks, drag marks, scratch marks and etching marks on metal, plastic and wood.

Mikrosil kit, casting material 200g with hardener 25g

Art. No.	Description	Unit
47850	black	1 kit
47851	white	1 kit
47852	brown	1 kit
49633	grey	1 kit

Hardener

Art. No.	Description	Unit
47853	Hardener for Mikrosil	25g 1 tube

Special foil for footprints, shoeprints and tyreprints

Art. No.	Description	Unit
50039	Special foil for footprints, shoeprints and tyreprints, 185 x 360mm	20 sheets 1 package

Shoe print kit, inkless

clean and simple method to take shoeprints or footprints (positive prints).

Art. No.	Description	Unit
50185	Shoe print kit ¹ , inkless with the following content: inkless coater, 100 sheets	1 kit

¹ Sale only within Germany

Casting frame

Indestructible, easy to clean professional version, continuously adjustable to individual needs, extremely space-savingly dismantlable to the dimensions 40 x 5 x 3cm.

Art. No.	Description	Unit
51328	Casting frame (stainless steel) Length: 29 - 68cm continuously variable Width: 13 - 31cm continuously variable	1 unit
52353	Spacer kit for casting frame suitable to art. No. 51328	1 kit

Casting strips aluminium

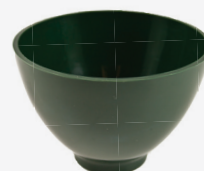

the most flexible method of a plaster cast

Art. No.	Description	Unit
51297	Casting strip aluminium, 5 x 114cm (WxL) with connector, endlessly expandable	1 unit
53518	Casting strip aluminium, 5 x 125cm (WxL)	1 unit

**Utilities and appliances**

Art. No.	Description	Unit	
47870	Mixing dish, plastic 80 x 120mm	1 unit	
52712	Plaster mixing bowl made of rubber 300ml	1 unit	
52713	Plaster mixing bowl made of rubber 500ml	1 unit	
52714	Plaster mixing bowl made of rubber 900ml	1 unit	
52715	Plaster mixing bowl made of rubber 1.8L	1 unit	
47877	Stabilisation mat for plaster cast, 15 x 115cm (WxL), plastic fabric	1 unit	
47872	Sieve, made of stainless steel 18cm (d) is used to sieve plaster	1 unit	
47873	Spatula, 150 x 17mm (LxW), wood	100 units	1 package
49537	Spatula, 150 x 18mm (LxW), wood individually packed	50 units	1 package
47874	Spatula, 150 x 18mm (LxW), plastic	100 units	1 package
52716	Spatula, 190 x 30mm (LxW), plastic light blue, with handle, can be used for mixing	1 unit	
47875	Putty knife standard steel, 40mm (W)	1 unit	
49104	Putty knife standard steel, 60mm (W)	1 unit

Utilities and appliances

Art. No.	Description	Unit
47632	Silicone separating agent, spray with a strong, long lasting separating effect, enables spraying in a very fine form for an even, very thin separating film, for tools as well	400ml 1 can
51845	Masking tape, Tesa 4331, 25mm x 50m (WxL), is suitable for marking silicone or AccuTrans castings, strong adhesion	1 unit
51042	Air duster can, type super 67	400ml 1 can

Fixing and contrast agents for shoeprints/tyreprints

Fixing agents for loose soil or sand. The surface is sealed and as a result it is impervious for casting material. Contrast agents are used for photographic purposes.

Art. No.	Description	Unit
51776	Lukas spray film colourless, gloss protective film with great adhesive force, water-repellent	400ml 1 can
47867	Marabu fixative spray fine, crystal-clear protective film, water-repellent	400ml 1 can
48744	Fixing spray (hairspray, strong hold)	250ml 1 can
47868	Snow print wax is used to fix shoeprints in snow, contrast because of its reddish colour, cold insulating, protects print from melting	425g 1 can
51777	Snow print powder Creating contrast to capture a higher level of detail of impression in snow. It is also completely functional at minus temperatures. Gentle insertion is possible to protect the evidence	250ml 1 container

Photo evidence ruler (further products on page 55)

Art. No.	Description	Unit
47255	Photo evidence ruler, U-shape measuring range 320 / 320 / 320mm made of plastic, thickness 0.7mm	3-piece 1 unit
47256	Photo evidence ruler, L-shape printed on both sides with additional range measuring range 300 / 150 and 300mm made of plastic, thickness 0.7mm black/white	2-part 1 unit
47878	Photo evidence ruler measuring range 350 / 200mm made of plastic, thickness 1mm black/white	2-piece 1 unit
50780	L-shape ruler 90°, white, with colour circle and black photomacrographic scale measuring range 105 / 105mm, made of acrylic glass opal, thickness 2mm with recess	1 unit

AccuTrans® (forensic silicone) by Coltène

Mixing system for casting, quick and simple application, dries quickly. Extremely tear-resistant, excellent legibility in oblique light, rigidity for storage, no harmful ingredients. It can also be used for fingerprints, blood prints, dental impressions, bite wounds and also on human skin and on wound surfaces.

Art. No.	Description	Unit
47857	brown, 75ml	1 unit
	for a quantity of 10 units	1 unit
47856	brown-ice, 75ml	1 unit
	for a quantity of 10 units	1 unit
47858	transparent, 75ml	1 unit
	for a quantity of 8 units	1 unit
47859	white, 75ml	1 unit
	for a quantity of 8 units	1 unit

VoiSil (forensic silicone) by Voigtländer

Art. No.	Description	Unit
52287	brown kit, 5ml, syringe with 3 mixing tips	1 kit
53393	white kit, 5ml, syringe with 3 mixing tips	1 kit

Also available as kit in brown-ice and transparent.

Accessories

Art. No.	Description	Unit
47862	Mixing tips yellow mixing tube D = 3.6mm	40 units 1 bag
47863	Mixing tips pink mixing tube d = 4.9mm	40 units 1 bag
51843	Mixing tips universal transparent, 3.6mm nozzle outlet, suitable for all tips (application/spreader tips)	40 units 1 bag
47479	Application tips for tiny openings suitable for art. No. 47862, 51843	100 units 1 bag
47494	Spreader tips, 8mm compatible with art. No. 47863, 51843	100 units 1 bag
48593	Spreader tips, 25mm suitable for art. No. 47863, 51843	100 units 1 bag
47861	Dispenser for AccuTrans cartridges	1 unit

AccuTrans® kit

4 cartridges, 1 dispenser, 60 mixing tips pink (can be individually equipped)

Art. No.	Description	Unit
50074	brown kit	1 kit
50306	brown-Ice kit	1 kit

We will be pleased to support you with the compilation of individual AccuTrans® kits.

AccuTrans® universal separation spray, separating agent

for a simple recasting of negative silicone impressions to positive ones.

Art. No.	Description	Unit
50284	Universal separation spray	50ml 1 can
